iTAK TLS Certificate Upload Instructions for Sit(x)

Step 1: Login to Web Portal > Navigate to Administration, Account Settings > Select TLS User Certs

(Login to parteamconnect.com with your email, unique password, and domain i.e. sofweek)

Step 2: Click the + Create TLS User Cert > Give it a Name > Select a User > Select a Group

*(Reminder, TLS Certs are Unique and Per User/Per Group)*

3. Download Package and Share to iOS Device > Click on Cloud w/ Arrow to Download

4. Upload to iOS Device > Download File Locally > Navigate to App 'My Files > Long Hold on Certificate Folder (Don't Open) > Select Share > Navigate to Applications and Select iTAK

(Note Sharing the TLS Cert to iTAK will automatically generate the server connection. You can navigate to the Settings Wheel > Click Network > Click Servers > See TLS Cert Connection to Sit(x) TAK Group)

For troubleshooting or more detailed information on managing iOS server connections or anything Sit(x) server-related, please contact sitx@partech.com

Disclaimer: iTAK is Developed by Syzygy and PAR Government is solely responsible for the server connection alone via Sit(x). For iTAK-specific issues or requests, please contact info@syzygyintegration.com

iTAK 2.0
Situational Awareness on iOS

Geographic Collaboration
Immediately interact across your team by sharing positions, points, chats, and digital pointers all while communicating securely with the TAK ecosystem.

Simplified User Experience
iTAK 2.0 leverages all of the latest iOS features with a modern intuitive interface. The system does not require training and has common tools easily accessible.

Modern Mapping
Built on modern iOS mapping features the systems comes with 3D mapping, 3D point placement, traffic, and points of interest.

Internet of TAK
Interoperates with TAK Server, ATAK, WinTAK, and all elements of the TAK ecosystem. Fully compatible with Syzygy Integrations TAKTeam infrastructure. iTAK is built from the ground up with security in mind keeping your sensitive operational data safe.
